FLOW

Creato dai nostri progettisti interni, Flow è un tavolino fluido e mutevole, composto da un piano in vetro e una base in metallo tubolare che disegna nell'aria una sinusoide dalle pulsazioni irregolari. Entrambi gli elementi sono altamente personalizzabili, potendo essere declinati in forme e finiture tra le più disparate. La base con le sue onde può essere plasmata da forma triangolare, circolare o allungata ed il piano in vetro può essere realizzato su misura per la forma di base creata, in funzione dell'uso e dello spazio in cui è posizionato.

Ciò che rimane è un'esperienza visiva che arriva alla vera essenza del mondo naturale: caos e materia, vita e movimento. Flow è un tavolino dalle linee pulite eppure con un tocco eccentrico. Pur mantenendo una profonda essenza di semplicità e funzionalità, questo elemento d'arredo introduce una svolta rinfrescante, estrosa: un'infusione di personalità vivace e inaspettata.

Piano: vetro spessore 10 mm. **Base:** metallo tubolare Ø30 mm a onda sinusoidale componibile. **Dettaglio:** anello di congiunzione in ottone in diverse finiture.

EN Created by our in-house designers, Flow is a fluid and mutable coffee table, composed of a glass top and a tubular metal base that draws a sinusoid with irregular pulsations in the air. Both elements are highly customisable, being able to be declined in the most diverse shapes and finishes. The base with its waves can be moulded from triangular, circular or elongated shapes, and the glass top can be tailored to the base shape created, depending on the use and space in which it is placed.

What remains is a visual experience that gets to the true essence of the natural world: chaos and matter, life and movement. Flow is a coffee table with clean lines and yet an eccentric touch. While maintaining a profound essence of simplicity and functionality, this piece of furniture introduces a refreshing, whimsical twist: an infusion of lively, unexpected personality.

Top: 10 mm thick glass. **Base:** Ø30 mm sine-wave tubular metal. **Detail:** brass joint ring in various finishes.

FR Flow a été conçue par nos designers internes, une table basse fluide et dynamique, avec un plateau en verre et une base métal tubulaire qui dessine dans l'air une sinusoïde aux pulsations irrégulières. Les deux éléments sont hautement personnalisables, offrant une gamme de formes et de finitions parmi les plus variées. La base avec ses ondes peut être façonnée en forme de triangle, circulaire ou allongée et le plateau en verre peut être réalisé sur mesure pour la forme de base créée, en fonction de l'utilisation et de l'espace dans lequel il est placé.

Ce qui reste est une expérience visuelle qui atteint la véritable essence du monde naturel : le chaos et la matière, la vie et le mouvement. Flow est une table basse aux lignes épurées et avec une touche excentrique. Tout en préservant une essence profonde de simplicité et de fonctionnalité, cette table basse apporte une touche fraîche et originale : une explosion de personnalité vive et inattendue.

Plateau: verre épaisseur 10 mm. **Base:** métal tubulaire Ø30 mm à onde sinusoidale modulable. **Détail:** anneau de jonction en laiton dans différentes finitions.

Due moduli di dimensioni differenti, progettati per essere combinati tra loro, permettono di creare infinite configurazioni.

Ogni modulo può essere collegato agli altri tramite un anello di giunzione in ottone, disponibile in diverse finiture.

Il top in vetro è completamente personalizzabile per rispondere sia a esigenze funzionali che estetiche.

Two modules of different sizes, designed to be combined with each other, allow for infinite configurations.

Each module can be connected to the others through a brass joint ring, available in various finishes.

The glass top is fully customizable to meet both functional and aesthetic needs.

Deux modules de tailles différentes, conçus pour être combinés entre eux, permettent de créer des configurations infinies.

Chaque module peut être relié aux autres par un anneau de jonction en laiton, disponible en plusieurs finitions.

Le plateau en verre est entièrement personnalisable pour répondre aux besoins fonctionnels et esthétiques.
